**Subject:** modification of \$401 Water Quality Certification, file # NRS09.146  
boat channel maintenance  
Lake and Obion Counties, Tennessee

Dear Mr. Martin:

This responds to your request to modify the subject certification to allow excavation and maintenance of the channel that connects the Kirby Pocket Access area to the main body of Reelfoot Lake.

You have stated that agency owned equipment would be used to excavate the bed material and that the excavated material would be disposed upland.

We have determined that the amended work plan will not materially worsen water quality aspects of the project. Therefore, the amended plan is hereby approved for construction. This modification also authorizes other like work at public access areas throughout Reelfoot Lake, provided the work is in existing boat access channels or areas and that the excavated material is disposed upland or discharge back into the lake via jet spray equipment.

All terms and conditions of the permit apply also to this work. Appeal and revocation procedures stated in the original permit apply to this modification. Please maintain this correspondence in your file for this permit.

Thank you very much for your consideration. If we can be of any assistance in this matter, please contact Robert Baker at [Robert.d.baker@state.tn.us](mailto:Robert.d.baker@state.tn.us) or 615-532-0710.

Sincerely,

*Daniel C. Eagar*

Daniel C. Eagar
